UI/UX Designer and  
Frontend Developer

 +234 816 273 4181

 adegbireisrael@gmail.com

 Lagos, Nigeria

## EDUCATION

Graduate

## SKILLS

- Creation of eye catching designs
- Prototyping
- User experience
- Experience in web design and mobile design

## LANGUAGE

English

## About Me

I am a creative and detail-oriented Front-End Developer and Graphic Designer with a strong background in crafting visually appealing and user-friendly digital experiences. With expertise in UI/UX design, I combine technical skills and design principles to build responsive, intuitive, and engaging interfaces that align with modern web standards.

## LEARNING EXPERIENCE

In UI/UX design, I developed a strong understanding of user-centered design principles. I learned to conduct user research, create wireframes and prototypes, and apply usability testing to ensure that designs were intuitive and accessible. This helped me appreciate the importance of empathy in design and how small design choices can greatly impact the user experience.

In graphic design, I explored visual storytelling, typography, color theory, and digital illustration. Using tools like Adobe Illustrator, Photoshop, Canva, and CorelDRAW, I created visually appealing graphics and branding materials that effectively communicated ideas. I also experimented with modern design trends such as glassmorphism, glowing effects, and motion animations to enhance the visual appeal of my projects.

Overall, these classes provided a comprehensive foundation for my growth as a designer and developer. I learned to blend creativity with technical skills, think critically about user experience, and produce work that is both visually engaging and functionally effective.

## CERTIFICATE:

FROM UPSCHOOL  
AFRICA
